RIDE-Q6

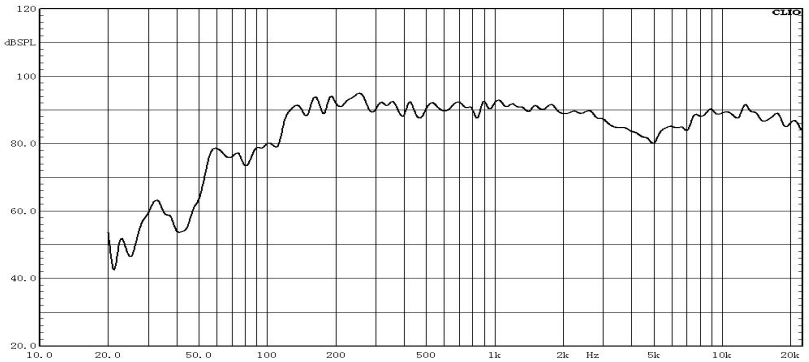

RIDE-Q6 is a premium 120W sound column that can operate in 8 ohm and 100 volt modes. The transformer has power taps of 7.5, 15, 30, 60 and 120 watts. The body color is black. It has six 4-inch speakers and two 1-inch speakers. The durable body, as well as the top and bottom covers are made of aluminum. The constant beam propagation technology of the sound column solves the problems of sound wave propagation in traditional conference rooms, lecture halls, as well as in background music systems for various architectural spaces. It will find its place in churches, museums, transport hubs and squares

Included:
Vertical wall mount

Optional:
RIDE-Q6-BR - wall swivel bracket

SPL vs Freq

Specification:

Type	Passive Column
Rated Power	120W at 8Ohm/100V (Maximum 240W)
Input Options	8Ohm / 100V
Transformer Taps100V	7.5W / 15W / 30W / 60W / 120W
Ways	2
Drivers	6x4” low-middle range woofer
High frequency driver	2x1” high frequency tweeter
Effective frequency range	100Hz - 20KHz
Sound Pressure Level	123dB
Sensitivity	102dB, measured at 1W/m
Coverage angle	136° x 40° (HxV)
Enclosure material	Aluminum alloy
Color	Black
Connection type	2x SPEAKON
Dimension (H*W*D)	885*130*132mm
Weight	13.2kg
